

THIRD PARTY NOTIFICATION

Third Party Notification is a special service we offer to help our customers avoid disconnection of their utility service.

This service may be helpful if there are any special circumstances present such as: the presence of infants, elderly persons, or the use of human life sustaining equipment.

With Third Party Notification, you can name a third party (relative, friend, clergyman, or special service agency) to be notified prior to disconnection of service. They will be able to contact us and act on your benefit, although they are not obligated to pay your bill nor will it necessarily prevent disconnection if payment is not made.
